

Assignment Details:

- **Create a Next.js Project with TypeScript:**
 - Set up a new Next.js project with TypeScript integration.
- **Display Ad Banners on the Home Page:**
 - Create a list of ad banners on the homepage (Power this using JSON list).
 - Each ad banner should include the following elements:
 - Title
 - Description
 - CTA (Call-to-Action)
 - Image
 - Background/Template
- **Add Edit Functionality:**
 - Each ad banner should have an edit icon.
 - Clicking the edit icon should open a bottom sheet where users can modify the details/elements of the ad banner.
 - The ad banner should update with the new details once the changes are saved.
- **Component Structure:**
 - **Ad Banner Component:** Create a reusable component for displaying ad banners, e.g., `BannerImageComp`.
 - **Bottom Sheet Edit Component:** Create a separate component for the bottom sheet edit functionality, e.g., `EditBannerTemplateBs`.
- **Modularity of Code:**
 - Ensure that your code is modular and follows best practices for frontend development.
 - The components should be well-structured and reusable.
- **Professional UI (Banners)**
